Description of Activities Performed:

On October 14, 2008, RST 2 mobilized to the Site and provided oversight and documentation support during the installation of geotextile material and rip-rap. In addition, on October 14, 2008 the draft site-specific QAPP was delivered to the OSC for review and comment. Prior to mobilization, RST 2 prepared and submitted the draft site-specific QAPP. During initial removal activities, RST 2 conducted total particulate monitoring utilizing three DataRam-4000 units. Particulate levels during Site activities were below the Site action level of 250 ug/m³, therefore daily particulate monitoring was terminated on October 20, 2008. Additional particulate monitoring was conducted on October 22, 2008 due to increased wind at the Site. The site-specific Action Level for total particulates was not exceeded.

RST 2 revised and submitted the site-specific QAPP on November 4, 2008, for the air and particulate monitoring based on comments received from the OSC. On November 18, 2008, RST 2 de-mobilized from the Site and initiated the preparation of a draft Removal Action Report for activities conducted during the Removal Action. The draft Removal Action Report was submitted to the OSC for comment and review on December 11, 2008.

On January 13, 2009, RST 2 submitted the revised PolRep No. 2 to the OSC for review and comment. On February 5, 2009, RST 2 posted and distributed the approved PolRep No. 2.
